

Certified Enterprise Risk Management Professional (CERMP)[™]

Program Overview

In today's ever-changing world, organizations are continuously faced with risks. These risks can have catastrophic impacts on an organization's success, reputation, and future. Unmanaged risk is the greatest source of waste in your business and in our economy as a whole.

When these risk events happen, thousands of jobs get lost, brilliant organizations are disassembled, expertise gets lost, and assets are destroyed. Yet all of these risks can be understood, identified, anticipated, mitigated, or reversed, thereby averting hundreds of billions of dollars in unnecessary losses.

Enterprise risk management (ERM) is often times an overlooked or under-implemented function, leaving organizations vulnerable and unprepared. This course will provide you with the fundamental concepts necessary to understand this function.

Participants in the International Institute for Executive Training (iIET) Certified Enterprise Risk Management Professional (CERMP) program will acquire knowledge of the evolutionary and fluid process of developing, implementing, and evaluating ERM. You will also learn how to monitor risk at an enterprise-wide level, as well as the application techniques necessary for implementing the process within your organization.

Independently Assessed and Endorsed by NASBA, the official board that regulates accounting and financial education in the United States of America.

Upon completion of this training course you will receive your certification that has been fully accredited by Qualifi. An official UK government recognized awarding organization.

Benefits of an Internationally Accredited Certification

- Our accredited courses have been independently assessed to ensure a **consistent and high quality** service.
- Our accreditation provides proof that we comply with **industry best practices**.
- Our accreditation demonstrates that our presenters have **vast technical knowledge and experience**.
- Studies have shown that individuals that attain international accreditation/certification are more likely to achieve **higher salaries** and be **promoted** over those individuals that are not.
- **Earn 42 Continuing Professional Education (CPE) units.**
